Department	Title	Name
国際教育イン ステイテュー ト	准教授	Colin Davis
Research Topic	Spatial Patterns of Industry Location and Economic Growth	
Summary of Research Results	<p>1. I have completed work on the development of a theoretical model of occupational choice that examines the relationship between spatial patterns of industry location and economic growth while considering implications for the direction of international trade and foreign direct investment flows. This work has been presented at an academic meeting and published in a refereed journal.</p> <p><u>Presentation</u></p> <p>“Regional integration and innovation offshoring with occupational choice and endogenous growth,” Rokko Forum, Kobe University, 2012.</p> <p><u>Publication</u></p> <p>“Regional integration and innovation offshoring with occupational choice and endogenous growth,” Journal of Economics, Vol. 108, pp. 59-79, 2013.</p> <p>2. Ken-ichi Hashimoto (Graduate School of Economics, Kobe University) and I have developed a theoretical model to examine the effects of R&D subsidies on patterns of industry location and economic growth. This work has produced a discussion paper that is currently under review with a refereed journal.</p> <p><u>Discussion Paper</u></p> <p>“R&D Subsidies, International Knowledge Dispersion, and Fully Endogenous Productivity Growth,” with Ken-ichi Hashimoto, Discussion Papers, Graduate School of Economics, Kobe University, 2012.</p>
