Evaluation criteria		Standpoints of evaluation 【 】shows the section in the application form
Objectives / Abstract of the research	1. Does this research properly capture the current issues and aim to achieve the SDGs goals?	【Objectives / Abstract】 Does this research consider the issues based on an appropriate analysis of the current status?
	2. Is the objective of the study consistent with the above?	【Objectives / Abstract】 Does this research show the importance and necessity of study to achieve the SDGs goals?
	3. Is the research appropriate as an All Doshisha Research Model?	【Objectives / Abstract】 Does this research show the characteristic of Doshisha University in the sense of solving social issues from various angles and contributing to society through the results?
Outcomes of the research	4. Is the contribution of research and its scope clear? Is the research appropriate as a university-wide priority?	【Future research plan after completion of this research】 Can the research contribute to the achievement of the goals of the SDGs? Is the research regarded as a university-wide priority issue based on its contribution?
	5. Is the dissemination of research results adequately planned?	【Future research plan after completion of this research】 Does the research plan show dissemination of the research results widely according to the achievement of the research?
Plan of the research	6. Is the goal-setting to the research plan appropriate?	【Research Plan】 Does this study have appropriate goals set for the purpose and show the expected outcome?
	7. Is the research plan appropriate for the achievement goal?	【Research Plan】 Does the research plan show a reasonable method and schedule for achieving the goals? Does the research plan indicate annual activities in concrete?
	8. Is the implementation system appropriate?	【Research member / Research Plan】 Is the research implementation system appropriate for the research plan? Is the division of roles of research members appropriate?
	9. Is the budget plan appropriate?	【Research budget】 Is the budget reasonable and expected to be used effectively? Are the items essential for the execution of the research listed?
	10. Is further development of the research expected after the completion of this research?	【Future research plan after completion of this research】 Is the concept of research after a year of support by this project clear, and can we expect research development?
